PHILIPS

Important notes for users in the U.K.

Mains plug

This apparatus is fitted with an approved 13 Amp plug. To change a fuse in this type of plug proceed as follows:

- 1 Remove fuse cover and fuse.
- 2 Fix new fuse which should be a BS1362 5 Amp, A.S.T.A. or BSI approved type.
- 3 Refit the fuse cover.

If the fitted plug is not suitable for your socket outlets, it should be cut off and an appropriate plug fitted in its place.

If the mains plug contains a fuse, this should have a value of 5 Amp. If a plug without a fuse is used, the fuse at the distribution board should not be greater than 5 Amp.

Note: The severed plug must be disposed of to avoid a possible shock hazard should it be inserted into a 13 Amp socket elsewhere.

How to connect a plug

The wires in the mains lead are coloured with the following code: blue = neutral (N), brown = live (L).

- As these colours may not correspond with the colour markings identifying the terminals in your plug, proceed as follows:
 - Connect the blue wire to the terminal marked N or coloured black.
 - Connect the brown wire to the terminal marked L or coloured red.
 - Do not connect either wire to the earth terminal in the plug, marked E (or \perp) or coloured green (or green and yellow).

Before replacing the plug cover, make certain that the cord grip is clamped over the sheath of the lead - not simply over the two wires.

Cleaning discs

To clean a disc, use a micro fibre cleaning cloth and wipe the disc from the center to the edge in a straight line.

CAUTION!

Do not use solvents such as benzene, thinner, commercially available cleaners, or anti-static sprays intended for discs.

Since the optical unit (laser) of the DVD system operates at a higher power than regular DVD or CD players, cleaning CDs intended for DVD or CD players may damage the optical unit (laser). Therefore, refrain from using a cleaning CD.

Setup

Finding a suitable location

- Place the set on a flat, hard and stable surface. Do not place the set on a carpet.
- Do not position the set on top of other equipment that might heat it up (e.g., receiver or amplifier).
- Do not put anything under the set (e.g., CDs, magazines).

Space for ventilation

- Place the apparatus in a location with adequate ventilation to prevent internal heat build up. Allow at least 10 cm (4.5") clearance from the rear and the top of the set and 5cm (2.3") from the left and right to prevent overheating.

Avoid high temperatures, moisture, water and dust

- Apparatus shall not be exposed to dripping or splashing.
- Do not place any sources of danger on the apparatus (e.g., liquid filled objects, lighted candles).

Basic Connections

Step 1: Set-up the speakers

You can choose to hang the speakers on the wall. Attach the supplied bracket firmly to the rear of speakers using the supplied screws. Then mount a screw (not supplied) on the wall where the speaker is to be hung and hook the speaker securely onto the mounted screw.

CAUTION!

You should get a qualified person to attach the brackets to the wall. DO NOT do it by yourself in order to avoid unexpected damage to the equipment or injury to personnel.

Helpful Hints:

- The rear speakers are labelled as REAR L (left) or REAR R (right).
- The front speakers are labelled as FRONT L (left) or FRONT R (right).

Step 2: Placing the speakers and subwoofer

For best possible surround sound, all the speakers (except subwoofer) should be placed at the same distance from the listening position.

- 1 Place the front left and right speakers at equal distances from the TV and at an angle of approximately 45 degrees from the listening position.
- 2 Place the centre speaker above the TV or the DVD system so that the centre channel's sound is localised.
- 3 Place the rear speakers at normal listening ear level facing each other or hang on the wall.
- 4 Place the subwoofer on the floor near the TV.

Helpful Hints:

- To avoid magnetic interference, do not position the front speakers too close to your TV.
- Allow adequate ventilation around the DVD system.

Basic Connections (continued)

Step 3: Connecting to TV and the speakers system

IMPORTANT!

- Connect the DVD system directly to the TV.
- Proceed to page 16 for setting up the TV once you have completed the connections.

- 1 Use the supplied scart video cable (black) to connect the DVD system's **SCART** socket to the corresponding Scart input socket on the TV.
- 2 Connect the supplied speakers system using the fixed speaker cables by matching the colours of the sockets and speaker cables.

Helpful Hints:

- Ensure that the speaker cables are correctly connected. Improper connections may damage the system due to a short-circuit.
- To prevent unwanted noise, do not place the subwoofer too close to the DVD system, AC power adaptor, TV or other radiation sources.

Basic Connections (continued)

English

Step 4: Connecting FM/MW antennas

- 1 Connect the supplied MW loop antenna to the **MW** socket. Place the MW loop antenna on a shelf, or attach it to a stand or wall.
- 2 Connect the supplied FM antenna to the **FM** socket. Extend the FM antenna and fix its ends to the wall.

For better FM stereo reception, connect an external FM antenna (not supplied).

Helpful Hints:

- Adjust the position of the antennas for optimal reception.
- Position the antennas as far as possible from your TV, VCR or other radiation source to prevent unwanted interference.

Step 5: Connecting the power cord

After everything is connected properly, plug the AC power cord into the power outlet.

The red Eco Power LED on the DVD system will light up. Never make or change any connections with the power switched on.

Helpful Hint:

- Refer to the type plate on the rear of the subwoofer for identification and supply ratings.

Connection to External Devices

Connecting a audio/video device

You can connect other audio/video device to the DVD system in order to use the Home Theatre Audio System's surround sound capabilities.

- Use an audio cable (red/white, not supplied) to connect the DVD system's **AUX IN (R/L)** sockets to the AUDIO OUT sockets on the audio/video device.

To listen to the sound, press **AUX/DI** to select "AUX" as the source to play.

Helpful Hint:

– Always refer to the user manual of the other devices for complete connection and use details.

Getting Started

Step 1: Inserting batteries into the remote control

- 1 Open the battery compartment.
- 2 Insert two batteries type R06 or AA, following the indications (+ -) inside the compartment.
- 3 Close the cover.

CAUTION!

- Remove batteries if they are exhausted or if the remote control is not to be used for a long time.
- Do not use old and new, or different types of batteries in combination.
- Batteries contain hazardous chemical substances, so they should be disposed of properly.

Using the remote control to operate the system

- 1 Aim the remote control directly at the remote sensor (iR) on the front panel.
- 2 Select the source you wish to control by pressing one of the source select buttons on the remote control (for example TV, TUNER).
- 3 Then select the desired function (for example ►, ◀, ◀◀, ▶▶).

Step 2: Switching on the DVD system

- Press the **SOURCE** control to select :
DISC → FM → MW → TV → AUX
→ DISC

OR

Press **DISC**, **TV**, **TUNER** or **AUX/DI** on the remote.

Switching to Eco Power standby mode

- Press **STANDBY ON** (⏻).
→ The display screen will go blank.

Step 3: Setting the TV

After connecting the DVD system to your TV, you have to switch the TV to the correct programme number for the input socket (e.g. 'EXT', '0', 'AV') in order to view the playback from the DVD system.

- 1 Press **SOURCE** control until "DISC" appears on the display panel.
- 2 Turn on the TV and set it to the correct video-in channel. You should see the blue DVD background screen on the TV.
→ Usually this channel is between the lowest and highest channels and may be called FRONT, A/V IN, VIDEO. See your TV manual for more details.
→ Or, you may go to channel 1 on your TV, then press the Channel down button repeatedly until you see the Video In channel.
→ Or, the TV remote control may have a button or switch that chooses between different video modes.

Selecting the matching colour system

The colour system of the DVD system, DVD and TV should match. Only then will it be possible to play a DVD on this system. Before changing the TV system, determine the colour system of your TV.

- 1 In disc mode, press **SETUP**.
- 2 Press **►** repeatedly to select { Video Setup Page }.
- 3 Press **▲▼** to highlight { **TV Type** }, then press **►**.

- 4 Press **▲▼** to highlight one of the options below:

{ PAL }

Select this if the connected TV has the PAL colour system. It will change the video signal of an NTSC disc and output it to PAL format.

{ NTSC }

Select this if the connected TV has the NTSC colour system. It will change the video signal of a PAL disc and output it to NTSC format.

{ Multi }

Select this if the connected TV is compatible with both NTSC and PAL (multi-system). The output format will be in accordance with the video signal of the disc.

- 5 Select a setting and press **OK**.
 → Follow the instructions shown on the TV to confirm the selection (if any).
 → If a blank/distorted TV screen appears, wait for 15 seconds for the auto recovery.

Setting the TV Display

Set the aspect ratio of the DVD system according to the TV you have connected. The format you select must be available on the disc. If it is not, the setting for TV display will not affect the picture during playback.

- 1 In disc mode, press **SETUP**.
- 2 Press **►** repeatedly to select { Video Setup Page }.
- 3 Press **▲▼** to highlight { **TV Display** }, then press **►**.

- 4 Press **▲▼** to highlight one of the options below:

{ 4:3 Pan Scan }

Select this if you have a conventional TV and want both sides of the picture to be trimmed or formatted to fit your TV screen.

{ 4:3 Letter Box }

Select this if you have a conventional TV. In this case, a wide picture with black bands on the upper and lower portions of the TV screen will be displayed.

{ 16:9 Wide Screen }

Select this if you have a wide-screen TV.

- 5 Select a setting and press **OK**.

TIPS: The underlined option is the factory default setting.
 To return to the previous menu, press **◀**. To remove the menu, press **SETUP**.

Getting Started (continued)

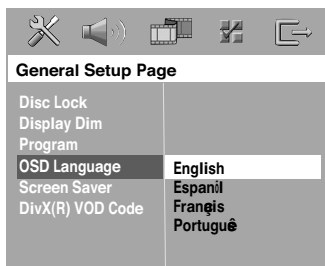

Step 4: Setting language preferences

You can select your preferred language settings so that this DVD system will automatically switch to the language for you whenever you load a disc. If the language selected is not available on the disc, the disc's default language will be used instead.

The OSD (On-Screen Display) language for the system menu will remain as you set it, regardless of the default and optional disc languages.

On-screen display (OSD) language

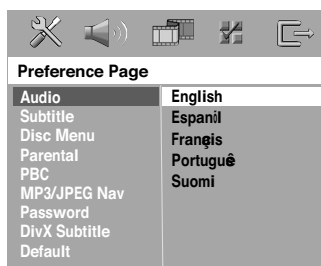

- 1 In disc mode, press **SETUP**.
- 2 Press **►** to select { General Setup Page }.
- 3 Press **▲▼** to highlight { **OSD Language** }, then press **►**.

- 4 Press **▲▼** to select a language and press **OK** to confirm.

Audio, Subtitle and Disc menu languages

- 1 Press **■** twice to stop playback (if any), then press **SETUP**.
- 2 Press **►** repeatedly to select { Preference Page }.
- 3 Press **▲▼** to highlight one of the options below, then press **►**.
 - { **Audio** } (disc's soundtrack)
 - { **Subtitle** } (disc's subtitles)
 - { **Disc Menu** } (disc's menu)

- 4 Press **▲▼** to select a language and press **OK** to confirm.

If the language you want is not in the list, then select { Others }.

Use the **numeric keypad (0-9)** on the remote to enter the 4-digit language code 'XXXX' (see page 5) and press **OK** to confirm.

- 5 Repeat steps 3~4 for other settings.

TIPS: The underlined option is the factory default setting.
To return to the previous menu, press **◀**. To remove the menu, press **SETUP**.

IMPORTANT!

- If the inhibit icon (ø or X) appears on the TV screen when a button is pressed, it means the function is not available on the current disc or at the current time.
- DVD discs and players are designed with regional restrictions. Before playing a disc, make sure the disc is for the same zone as your player.
- Do not push on the disc tray or put any objects other than discs on the disc tray. Doing so may cause the disc player to malfunction.

Playable discs

Your DVD home theatre system will play:

- Digital Versatile Discs (DVDs)
- Video CDs (VCDs)

Restricting playback by Parental Control

Some DVDs may have a parental level assigned to the complete disc or to certain scenes on the disc. This feature lets you set a playback limitation level. The rating levels are from 1 to 8 and are country dependent. You can prohibit the playing of certain discs that are not suitable for your children, or have certain discs played with alternative scenes.

- 1 In 'Preference Page', use ▲▼ keys to highlight { **Parental** }, then press ►.

- 2 Use ▲▼ keys to highlight a rating level for the disc inserted and press **OK**.
- 3 Use the **numeric keypad (0-9)** to enter the six-digit password (see page 34 "Changing the password").
→ DVDs that are rated above the level you selected will not play unless you enter your six-digit password.

Rating explanations

1 Kid Safe – 2 G

– General Audience; recommended as acceptable for viewers of all ages.

3 PG

– Parental Guidance suggested.

4 PG13

– Material is unsuitable for children under the age of 13.

5 PGR – 6 R

– Parental Guidance - Restricted; recommended that parents restrict children under the age of 17 from viewing or allow them to view only when supervised by a parent or adult guardian.

7 NC-17

– No children under the age of 17; not recommended viewing for children under the age of 17.

8 Adult

– Mature material; should be viewed only by adults due to graphic sexual material, violence or language.

Helpful Hints:

- VCD, SVCD, CD have no level indication, so parental control has no effect on these type of discs. This also applies to most illegal DVDs.
- Some DVDs are not encoded with a rating though the movie rating may be printed on the Disc cover. The rating level feature does not prohibit play of such Discs.

TIPS: The underlined option is the factory default setting.

- 4 Use **◀▶** keys to set the volume level for each speaker (-6dB ~ +6dB).
- 5 Press **OK** to confirm.

- 6 Use **▲▼** keys to highlight { **Speakers Delay** }, then press **►**.

- 7 Use **◀▶** keys to set the delay times for centre and rear speakers that best suit your surround sound needs.
- 8 Press **OK** to confirm.

Helpful Hints:

- A 1ms increase/decrease of delay time is equivalent to 30cm change in distance.
- Use the longer delay time settings when the rear speakers are closer to the listener than the front speakers.
- The test tone will be automatically generated to help you judge the sound level of each speaker.

TIPS: The underlined option is the factory default setting.
To return to the previous menu, press **◀**. To remove the menu, press **SETUP**.

Sound and Volume Controls (continued)

Selecting surround sound

- Press **SURR** on the remote to select :
MULTI-CHANNEL or STEREO.
→ The availability of the various surround sound modes depends on the number of speakers used and the sound available on the disc.
→ The centre and surround speakers operate only in Multi-channel surround mode.
→ The available output modes for Multi-channel include: Dolby Digital, DTS (Digital Theatre Systems) Surround and Dolby Pro Logic II.
→ Stereo broadcasts or recordings will produce some surround channel effects when played in a surround mode. However, mono (single channel sound) sources will not produce any sound from the surround speakers.

Helpful Hint:

– You are not able to select the surround sound mode if the system setup menu is turned on.

Selecting digital sound effects

Select a preset digital sound effects that matches your disc's content or that optimises the sound of the musical style you are playing.

- Press **SOUND** to select the available sound effect.

When playing movie discs or in TV mode, you can select :

CONCERT, DRAMA, ACTION or SCI-FI.

When playing music discs or while in TUNER or AUX/DI mode, you can select :
ROCK, DIGITAL, CLASSIC or JAZZ.

Helpful Hint:

– For flat sound output, select **CONCERT** or **CLASSIC**.

Volume control

- Adjust **VOLUME** control (or press **VOL + / -** on the remote) to increase or decrease the volume level.
→ "VOL MIN" is the minimum volume level and "VOL MAX" is the maximum volume level.

To turn off the volume temporarily

- Press **MUTE** on the remote.
→ Playback will continue without sound and "MUTE" appears.
→ To restore the volume, press **MUTE** again, or increase the volume level.

Other Functions

Setting the Sleep timer

The sleep timer enables the system to switch to Eco Power standby mode automatically at a preset time.

- Press **SLEEP** on the remote repeatedly until it reaches the desired preset turn-off time.
 - The selections are as follows (time in minutes):
 15 → 30 → 45 → 60 → OFF → 15...
 - 'SLEEP' icon will show on the display panel if sleep mode is active.
 - Before the system switches to Eco Power standby mode, a countdown of 10 seconds is displayed.
 "SLEEP 10" → "SLEEP 9".... →
 "SLEEP 1" → "STANDBY"

To cancel the sleep timer

- Press **SLEEP** repeatedly until "OFF" appears or press the **STANDBY ON** (⏻) button.

Glossary

Analogue: Sound that has not been turned into numbers. Analogue sound varies, while digital sound has specific numerical values. These sockets send audio through two channels, the left and right.

AUDIO OUT Jacks: Red and white jacks on the back of the DVD System that send audio to another system (TV, Stereo, etc.).

Aspect ratio: The ratio of vertical and horizontal sizes of a displayed image. The horizontal vs. vertical ratio of conventional TVs is 4:3, and that of wide-screens is 16:9.

Bit Rate: The amount of data used to hold a given length of music; measured in kilobits per second, or kbps. Or, the speed at which you record. Generally, the higher the bit rate, or the higher the recording speed, the better the sound quality. However, higher bit rates use more space on a Disc.

Chapter: Sections of a picture or a music piece on a DVD that are smaller than titles. A title is composed of several chapters. Each chapter is assigned a chapter number enabling you to locate the chapter you want.

Disc menu: A screen display prepared for allowing selection of images, sounds, subtitles, multi-angles, etc recorded on a DVD.

DivX 3.11/4.x/5.x: The DivX code is a patent-pending, MPEG-4 based video compression technology, developed by DivXNetworks, Inc., that can shrink digital video to sizes small enough to be transported over the internet, while maintaining high visual quality.

Dolby Digital: A surround sound system developed by Dolby Laboratories containing up to six channels of digital audio (front left and right, surround left and right, centre and subwoofer).

Dolby Surround Pro Logic II: It is an improved matrix decoding technology that provides better spatiality and directionality on Dolby Surround programme material; provides a convincing three-dimensional soundfield on conventional stereo music recordings; and is ideally suited to bring the surround experience to automotive sound. While conventional surround programming is fully compatible with Dolby Surround Pro Logic II decoders, soundtracks will be able to be encoded specifically to take full advantage of Pro Logic II playback, including separate left and right surround channels. (Such material also compatible with conventional Pro Logic decoders).

DTS: Digital Theatre Systems. This is a surround sound system, but it is different from Dolby Digital. The formats were developed by different companies.

JPEG: A very common digital still picture format. A still-picture data compression system proposed by the Joint Photographic Expert Group, which features small decrease in image quality in spite of its high compression ratio.

MP3: A file format with a sound data compression system. "MP3" is the abbreviation of Motion Picture Experts Group 1 (or MPEG-1) Audio Layer 3. By using the MP3 format. One CD-R or CD-RW can contain about 10 times more data than a regular CD.

Multichannel: DVDs are formatted to have each sound track constitute one sound field. Multichannel refers to a structure of sound tracks having three or more channels.

Parental control: Limits Disc play according to the age of the users or the limitation level in each country. The limitation varies from disc to disc; when it is activated, playback will be prohibited if the software's level is higher than the user-set level.

Playback control (PBC): Refers to the signal recorded on video CDs or SVCDs for controlling playback. By using menu screens recorded on a Video CD or SVCD that supports PBC, you can enjoy interactive playback and searching.

Region code: A system allowing discs to be played only in the region designated. This unit will only play discs that have compatible region codes. You can find the region code of your unit by looking on the product label. Some discs are compatible with more than one region (or ALL regions).

Surround: A system for creating realistic three-dimensional sound fields full of realism by arranging multiple speakers around the listener.

Title: The longest section of a movie or music feature on DVD. Each title is assigned a title number, enabling you to locate the title you want.

VIDEO OUT jack: Yellow jack on the back of the DVD system that sends the DVD picture video to a TV.
